

## **B5 Lesson 2: Transpiration and Translocation**

- Describe the path of water through a plant from the soil to the air.
  
- What is transpiration?
  
- Write how you think the following might affect the rate (speed) of transpiration:
  - Temperature
  
  - Wind
  
  - Humidity
  
  - Number of stomata
  
- Why and how does water move up the stem?
  
- What is translocation?
