

B5 Lesson 3: The Heart and The Circulatory System

- Label your heart diagram with the following: left atrium, left ventricle, aorta, pulmonary vein, pulmonary artery, septum. If you can colour the left side red and right side blue.
- What is the circulatory system composed of?
- How is the heart adapted to its function?
- What causes a heart attack/heart disease?
- How can heart disease be reduced?
- Draw or explain how double circulation works in humans.
